THE NUBIA MINI BUS

**GEYUSHI**

# INTRODUCING NUBIA MINI BUS

FROM GEYUSHI AUTOMOTIVE INDUSTRY

Meet the **NUBIA**, a Mini bus designed to handle tough routes and open up new paths. Safety is our top priority, making sure everyone onboard is protected and secure. You'll also notice the comfort – smooth rides that make every trip special. It's a strong yet stylish vehicle, built for reliability and confidence. The high - quality insulation keeps the inside calm, quiet, and protected from the elements. Choose from 7 or 8 meters, and let the NUBIA help you explore more and travel further.

# NUBIA MINI BUS

# EXTERIOR DESIGN

The **NUBIA** MINI BUS seamlessly melds form with function in its exterior design. Its modern appearance isn't merely for aesthetics; it aligns with the aerodynamic build, ensuring smoother rides and better fuel efficiency. Bright LED lights guarantee optimal visibility during night drives, while the daytime running lights enhance safety, ensuring the vehicle is always visible to other road users. The inclusion of an automatic power door, available as foldable or plug, showcases our commitment to user convenience, facilitating easy boarding and alighting. A front panoramic glass not only offers a stylish look but also provides passengers with an expansive view of their surroundings, enhancing their travel experience. And, with side options of either double glazed for better insulation and noise reduction or sliding single-glazed for flexibility and ventilation, passenger comfort is prioritized at every turn. With the **NUBIA** MINI BUS, each feature is thoughtfully designed to elevate the journey.

# STRENGTH IN DESIGN

## STORAGE AREA

The **NUBIA** MINI BUS boasts impressive storage solutions for all travel needs. At the lower luggage compartment area, there's a spacious 3 meter cubed storage area, easily accessible through five separate openings, ensuring luggage and larger items are stowed securely. For passengers' smaller belongings or items they want within reach, additional storage racks are conveniently placed above the seats inside the bus. These features highlight our commitment to maximizing space and ensuring a clutter-free, comfortable journey for everyone onboard.

**INTERIOR  
DESIGN.**

## INTERIOR DESIGN

The **NUBIA** MINI BUS encapsulates elegance and functionality in its interior offerings. Accommodating up to 33 passengers, each seat is thoughtfully designed for spaciousness and features a reclining backrest for unparalleled comfort. For those desiring additional movement, an optional side motion feature is available. Ambient blue LED lighting suffuses the bus, providing a tranquil atmosphere. Modern conveniences like optional USB ports cater to today's digitally-connected traveler. Prioritizing security, an optional integrated 3-camera CCTV system vigilantly monitors the surroundings, while the availability of a 3-point seatbelt for each seat underscores our commitment to passenger safety.

**INTERIOR**  
FEATURES

## INTERIOR FEATURES

Delving into advanced features, the interior is bathed in a gentle blue LED lighting, setting a serene atmosphere. Each personal unit is equipped with individual air conditioning and lighting, ensuring a tailored travel experience for every passenger. An LCD display at the front caters to both entertainment and informative needs. Modern conveniences, such as optional USB ports, cater to the digitally-connected traveler.
